Trans. of Virus (Japan) 1957, v. 7, no. 1, p. 160-175.

DESCRIPTORS: Electron microscopy, Viruses,
Morphology, Nuclei (biology), Cells (biology),
Identification.

In observations with the portable cryo-electron
groups of viral particles isolated from the infected
cells were obtained. The particles were of spherical
and oval shapes ranging from 0.1 to 0.2 microns.
Common electron microscopy of the particles showed
an electron-dense outer layer and a less dense inner
core. Inside of these, many viral particles were observed
in bunches. In the inclusion bodies, the presence of large
biological structures (Microbiology, F1, virology, 59-1000)
